Comprehensive Rehab Outcomes

2023 Annual Outcomes Data

DISCHARGE
DESTINATION TO
COMMUNITY
(Greater is better)

AVERAGE LENGTH OF STAY (Lower is better)

FUNCTIONAL CHANGE IN SELF-CARE (Greater is better)

Patients' functional activities for selfcare are measured when they arrive (admission) and throughout their rehabilitation stay. By the time patients leave the rehab program (discharge), we expect an increase in functional quality measures of self-care of more than 15 points, greater than national averages.

FUNCTIONAL CHANGE IN MOBILITY (Greater is better)

Patients' functional activities for selfcare and mobility are measured when they arrive (admission) and throughout their rehabilitation stay. By the time patients leave the rehab program (discharge), we expect an increase in functional quality measures of mobility of more than 35 points, greater than national averages.

FUNCTIONAL EFFICIENCY (Greater is better)

Patients' progression for self-care and mobility are measured per day of their rehabilitation stay to gauge progress made within the efficiency of the program. By the time patients leave the rehab program (discharge), we expect functional efficiency to measure more than 4.70, greater than national averages.

NUMBER OF PERSONS SERVED

RETURN TO ACUTE CARE (Lower is better)

AVERAGE NUMBER OF HOURS OF TREATMENT PER DAY

SATISFACTION OF THE PERSONS SERVED WITH THE SERVICES RENDERED
