

Amputation Outcomes

2022 Annual Outcomes Data

**DISCHARGE
DESTINATION TO
COMMUNITY**
(Greater is better)

86.2%

**NUMBER OF
PERSONS
SERVED**

87

**AVERAGE
LENGTH OF
STAY**
(Lower is better)

**12.4
days**

**RETURN TO
ACUTE CARE**
(Lower is better)

8%

**FUNCTIONAL
CHANGE IN
SELF-CARE**
(Greater is better)

38.6

Patients' functional activities for self-care are measured when they arrive (admission) and throughout their rehabilitation stay. By the time patients leave the rehab program (discharge), we expect an increase in functional quality measures of self-care of more than 15 points, greater than national averages.

**AVERAGE
NUMBER OF
HOURS OF
TREATMENT
PER DAY**

6

**FUNCTIONAL
CHANGE IN
MOBILITY**
(Greater is better)

38.1

Patients' functional activities for mobility are measured when they arrive (admission) and throughout their rehabilitation stay. By the time patients leave the rehab program (discharge), we expect an increase in functional quality measures of mobility of more than 35 points, greater than national averages.

**SATISFACTION
OF THE PERSONS
SERVED WITH
THE SERVICES
RENDERED**

93.2%

**FUNCTIONAL
EFFICIENCY**
(Greater is better)

4.91

Patients' progression for self-care and mobility are measured per day of their rehabilitation stay to gauge progress made within the efficiency of the program. By the time patients leave the rehab program (discharge), we expect functional efficiency to measure more than 4.70, greater than national averages.
